Applications

Ever been in the middle of nowhere, you and your friends could share a single internet connection across multiple devices?

MR600 will enable you to get Wifi Connection with any one of several supported WWAN PCMCIA or USB WWAN dongles that you can get from your Telecom carrier. It shares the connection via WiFi and it is really easy to set up.

With the external accessories (car kit or external battery), mobile Wifi Hotspots had never been made so easy to configure and use.

Getting connected to Wifi has never been so easy. No need anymore to wait for hotspot availability, bandwidth, provide credit card information...

Connect all Wifi Devices Together

The vYSoo Mobile Router MR600 enables all the wifi devices to connect and share a mobile Network. You can connect easily and safely through Wifi or LAN connection for example your Iphone, PDA, Laptop, Desktop PC, Wifi Printer, NAS server, IP TV, IP Radio, Wifi DVD player, IP Camera, Media Player,... all together or to Internet through your WWAN connection.

Mobile Business

With vYSoo MR600, Mobile users and enterprises can connect to the Internet or corporate networks at virtually any location where a cellular data network is available. By utilizing the wireless gateway solution, businesses can minimize the investment and time required to set up a temporary or mobile office. Wherever you are (in your car, in your office, at home, in a hotel, at a customer site, in the street,...) MR600 gives you and your team instant, reliable, and secure Internet access wherever you need. Great for simplifying individual access as well as sharing – no need to give a credit card number, add hardware or software to your PC or your colleagues' devices to get connected to the Internet. Not only your laptop, but all your working environment is now Mobile

Finish High Cellular Phones rates. Enjoy VoIP anywhere Enjoy the low rates of VoIP national and international calls wherever you are. Participate to Conference calls from your car, your hotel,... at the lowest worldwide rates. Using the router with a Wifi phone, you don't need anymore to boot your computer or have a headset to make cheap calls. Get a Wifi phone with VoIP and enjoy free roaming charges. Wherever you are in the world, your Business Number is following you.

Vacation

All the luxuries of home include Internet access – even if home is on the road or away from home. The MR600 gives you a great way to unleash the modem built-in your Cellular phone. And tethered data service can be activated for just the months you need it instead of making long term commitments. An added feature is the ability to put your phone where you have signal, and use your laptop where it's convenient. With the MR600, you no longer have to hunt around for a public WiFi hotspot to get Internet access when on vacation
