Get On-screen Information

The new LAN Cordless DUALphone makes it possible

With The LAN Cordless DUALphone, you can get on-screen information such as the latest news, traffic, flight schedules, horoscopes, and sport scores, whenever they become available. Simply specify the information you want displayed, and it is there when you want it. You don't have to turn on your computer - the LAN Cordless DUALphone does all the work. If you have more than one handset, you can even specify different information services for each handset.*

The phone notifies you when new software is available. Press a key and all the latest features are installed effortlessly and effectively.

when you want it

Expand your phone system

The LAN Cordless DUALphone supports 3 simultaneous calls. You can easily and conveniently set up separate lines for you and your children, or separate lines at your office. The LAN Cordless DUALphone also supports up to 8 handsets that may be placed wherever you want them throughout your home or office. Press a key, and the extra handsets are ready for use. You can even use the extra handsets for intercom or conferences, making the LAN Cordless DUALphone the perfect choice for the small office or home office.

* Availability of services depends on your service provider.

Enjoy the best of both Worlds

Discover the opportunities of the new LAN Cordless **DU@L**phone™

Not quite sure if you are ready to give up ordinary telephony? With the LAN Cordless DU@Lphone you don't have to choose. It is both an Internet phone and a normal phone in one device. Just plug the LAN Cordless DU@Lphone in a standard telephone socket, and you can use it like any regular phone. You can also decide whether to use the Internet or a landline connection for emergency calls.

2-in-1
Telephone

Free Internet Calls Worldwide

Hi...

CAROL JOHNSON, UK

Reduce your phone bill

With The LAN Cordless DUALphone you take full advantage of inexpensive Internet telephony by using your broadband Internet connection for all your calls. It is as easy as making ordinary phone calls, but you can make calls at a fraction of standard international and national rates - sometimes even for free. So forget about the costs of calling family abroad or calling international customers.

Hola

LOUIS FERNANDEZ, CHILE

Forget the Computer when making Internet Calls

Try the first hybrid, web enabled VoIP LAN Cordless DU@Lphone.

The LAN Cordless DU@Lphone is the next-generation wireless Internet phone from RTX. With this phone you can make inexpensive Internet calls without turning on your computer. The LAN Cordless DU@Lphone is SIP based and easy to set up and use. Naturally, it is always online and keeps you up-to-date with all your messages and personalised web content.

Enjoy the freedom

The LAN Cordless DU@Lphone lets you move around the house or office at your convenience. You don't have to worry about wires or cords, and you don't even have to be sitting at your desk with your computer turned on.

Manage your messages

The LAN Cordless DU@Lphone provides instant information about your voice mail, missed calls, or new e-mails. You can even preview your e-mails without turning on the computer.*

The unified messaging indicator automatically flashes as soon as you have any new messages. So you don't have to spend time picking up the phone to find out if you have any messages waiting. This is an ideal solution for use at home or at the office.

* Set-up procedure varies depending on the pre-configuration.

Easy to use

The LAN Cordless DUALphone is designed to meet your needs. The functions of the LAN Cordless DUALphone are simple and easy to use. You can view a log of incoming and outgoing calls, see the names and numbers of incoming callers, forward calls, and much more. You can also store up to 200 entries in the phone book. In addition, the large, backlit, color screen provides sharp and crisp text and graphics, making it easy to read web content and use the menus.

Plug & dial

To use the phone, simply connect the LAN Cordless DUALphone to a broadband modem or router, and you are ready to make your first call. Moreover, the phone will automatically notify you when new software is available. Press a key and all the latest features are installed - effortlessly and efficiently.
