

H4000 HD Upscaling DVD Player

Upscale your home theater with even more HD options

The HELIOS H4000 HD Upscaling DVD Player is the only player in the market that can bring your home theater images to a stunning **1080p resolution** through HDMI, component and even better, 1080i through VGA/RGB-HV outputs.

With 10 different resolutions to choose from, the H4000 upscales not only your standard DVD titles, but also "home-made" DVDs, not to mention MPEG4 formats such as DivX and XviD stored in your CDRs and DVDRs!

VGA/RGB-HV outputs even give you the ability to upscale to 1080i on your projectors! And with 576i video output via HDMI, the H4000 is ideal for your external video scalars.

With a slick design in a compact and lightweight plastic case, the H4000 brings an added touch of style to your home theater.
